

PROCUREMENT POLICY

Purpose

The Transparency International Australia (TIA) Procurement Policy is guided by our organisational values which prioritise Transparency and Accountability in all facets of our work. This policy has been developed to clearly define our principled approach to procurement as well as to outline the specific standards, procedures and templates that apply in procuring goods and services for our operations in Australia. Our Procurement Policy has been developed and will be reviewed in accordance with the Commonwealth Procurement Rules (CPR)¹, and Transparency International's Procurement Policy.

Scope

This policy applies to all TIA Board Members, employees, volunteers and interns.

This policy may also apply to the staff of partner organisations and consultants where the partner organisation or consultant does not have a procurement policy that meets TIA standards.

Principles

TIA is committed to transparency and accountability in procuring goods and services to support its work. This applies to internal procurement as well as procurement that engages with external parties including sub-contractors and suppliers.

TIA commits to:

- > Effectively managing its procurement processes in accordance with all related policies and procedures;
- > Ensuring that procurement processes reflect and are consistent with Australian Commonwealth Procurement Rules;
- > Implementing a review process to strengthen procurement processes, reflect required standards and achieve best practice;
- > In all procurement related activities, managing an effective and ethical procurement process that reflects our values as an organisation while also procuring and delivering goods and services in a timely and cost-effective manner and that are fit for purpose.

TIA adheres to the four core principles of procurement, namely:

- > Transparency and accountability;
- > Value for Money;
- > Ethical Procurement Practices
- > Adherence to Procurement Policy and Procedures

¹ <https://www.finance.gov.au/sites/default/files/commonwealth-procurement-rules-1-jan-18.pdf>

Achieving value for money is an underlying principle which applies to all aspects of procurement and shall consider financial and non-financial costs and benefits (explained further below).

Ethical procurement practices ensure that all procurement must be conducted in a transparent and accountable manner. This is inherently linked to achieving value for money outcomes and providing quality responses to procurement needs. Adherence to client procurement policies ensures that TIA team members must make suppliers aware of DFAT's policies and obligations during the procurement process to ensure that only suppliers able to meet these obligations are selected for the provision of goods and services.

Value for Money Approach

TIA will apply a value for money (VfM) approach in all procurement activities seeking an appropriate balance across the concepts of effectiveness, efficiency and economy. TIA's VfM methodology also recognises that organisational ethics and a conscientious approach to risk management must underpin all procurement practices to promote accountability in dealing with stakeholders and constituents.

TIA will through its procurement processes:

- > Encourage competition for procurement of relevant goods and services;
- > Ensure non-discrimination in procurement;
- > Use available resources in an efficient, effective and ethical manner; and
- > Ensure that procurement decisions are made in a consultative and transparent manner.

Responsibilities

Detailed roles and responsibilities are outlined in Appendix A.

Any exceptions to this policy must be approved by the CEO.

Practice

Decision-Making Approach

All relevant, tendering and contracting connected with TIA will follow a standardised process of assessment and approval to ensure compliance with key procurement principles and obligations noted in this policy.

In general terms, all procurement decisions must be made based on the availability of budget and with the approval of the relevant TI staff member and in accordance with the approved level of delegation/approval authority.

The evaluation criteria used for selecting goods and services will vary according to the type of procurement requested, however several key criteria will underpin TI Australia's approach:

- > Cost effectiveness including whole of life costs;
- > Quality of goods and services;
- > Relevant experience and expertise including performance history;
- > Flexibility and innovation;
- > Ethical approach including responsible supply chain management.

Procurement Categories

The common categories of procurement for TIA are noted below:

Procurement Category	Types of procurement
Office supplies and services	Stationery, consumables, printing supplies, IT hardware
Travel	Flights, accommodation, meals, miscellaneous expenses
Consultancy services	Consultancy fees and associated costs

Procurement Approval Process

Process	Category A	Category B	Category C
	Procurements valued up to \$100	Procurements valued up to \$1000	Procurements valued over \$1000
Procurement Method	Preferred Supplier or Verbal Quotes	Preferred Supplier or written quotes	Request for quotation
Selection Criteria	Lowest price	Lowest price	Lowest-price, quality and meeting key criteria/specifications
Documentation	Receipt	Evidence of quote, invoice, receipt	Evidence of quote, Contract / Agreement, invoice, receipt
Payment Method	Cash, bank transfer, credit card	Bank transfer or credit card	Bank transfer
Approval Delegation	Budget holder	Budget holder and Finance Manager	Head of Programme

Procurement Documentation

TIA will ensure that all relevant documentation relating to procurement processes is produced, approved and filed accordingly. Documents should be maintained in hard and soft copy forms in accordance with financial record keeping protocols and/or for the duration of prescribed auditing periods. Maintaining procurement records is essential to demonstrating transparency and accountability in the procurement process.

Key documentation will include:

- > Procurement Requisition Forms;

- > Evidence of written quotes or tender submissions proposals received from suppliers;
- > Approved minutes/recommendations from the quotation/tender evaluation committee or person;
- > Contract documents;
- > Purchase orders and payment request documents;
- > Invoices and receipts;
- > Travel Terms of Reference and approval.

Thresholds

Decision-making responsibilities will vary in accordance with the value and nature of the procurement in question. Goods and Services procurements of a higher monetary value or higher risk level require more rigorous review and assessment and a higher level signing authority, whereas lower value and low risk procurements can be approved through standardised procurement processes established with the finance and administration departments.

Quotations will be sought for all program procurement to promote competition and demonstrate openness.

For **low value (Category A)** procurements can be made on the basis of cost effectiveness (i.e. lowest price) and via verbal quotations from suppliers. Three quotations should always be sought and where three quotations cannot be sought, a justification should be provided.

For **medium value (Category B)** procurements, three formal written quotations should be sought and documented. Where applicable, specific quality and ethical supplier-based selection criteria should be used as well as cost effectiveness to determine a preferred supplier.

For **high value (Category C)** of high risk procurements or procurements assessed to be high risk, a formal quotation or tendering process should be followed. This approach should include more detailed selection and assessment criteria which emphasise both cost and quality requirements and the use of a quotation or tender assessment panel to determine the preferred supplier/contractor. Contractors may also be interviewed where required.

Preferred Suppliers – For lower value procurements where suppliers have been assessed to provide value for money and have demonstrated they are able to meet the key requirements of the goods or services required – including cost, timeliness and quality – they may be engaged without the need to formally undertake a procurement process. Specific details of Preferred Suppliers will be entered and maintained in a preferred supplier list.

Engaging Contractors

For external contracting of individuals or parties to perform work for TIA, the procurement method will depend on the specific nature of the work involved as described in the terms of reference.

Procurement options include:

- a. **Open Tenders** – Requesting via an advertisement, quotes or proposals from reputable suppliers who are able to provide the required goods/services. This method provides the best opportunity for active competition amongst suppliers.
- b. **Pre-qualified or Limited Tender** – An invitation for quotes or proposals, but based on specific conditions (i.e. level of experience, certifications or specialist capacity) restricts the field of eligible suppliers to a shortlist. This approach may be preferred due to the urgency of the procurement or where an open tender would not be timely or effective.
- c. **Sole Sourcing** – Seeking quotes or proposals from only a single contractor. If this approach is undertaken, a clear justification should be provided.
